pair of printed circuit boards mounted on opposite sides of the memory chips to electrically interconnect the memory chips. Each printed circuit board has vias that are positioned to form multiple rows, with each row of vias used to connect the printed circuit board to a respective memory chip. The vias falling along the bottom-most row of each printed circuit board are also exposed and are used to surface mount the multi-chip module to pads of a memory board.

... chip stacking reissue patent. Simple Technology originally filed the lawsuit against Dense-Pac in September 1998 based upon its IC Tower(TM) stacking patent, U.S. Patent No. **5,514,907**, which was granted in May 1996. Last month, Simple Technology was granted a reissue patent, Re. 36,916, which expanded the company's claims to this innovative technology.
